

**“Cougar” – an innovative SCPA that is more than capable of handling the demanding UMTS (3G) networks.**

**2100 MHz, 12W, W-CDMA**

When compared to currently available Single Channel UMTS (3G) power amplifiers, “Cougar” outperforms the competition in every aspect:

- Advanced technology, innovative design and technical layout.
- Compact size, 220x157x25mm. Current competitive systems are several times larger.
- Superior field performance, as evidenced by hundreds of units already installed.
- Very competitive price, comparable systems cost several times as much.
- Readily available, delivery can be as soon as 4-6 weeks A.R.O.

When it comes to the size/power/price ratio, the 12W “Cougar” is in a category of its own.
