

WebReview

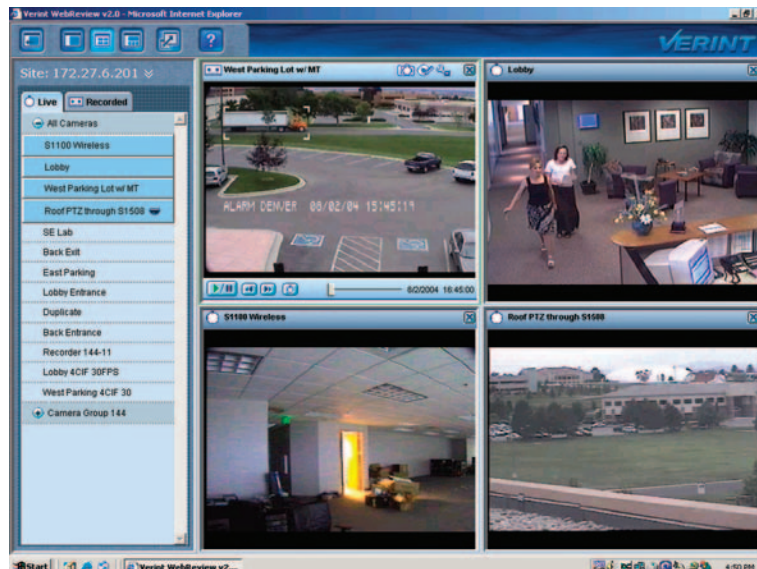

WebReview™ provides anywhere/anytime access to your digital video network using a standard Web browser and Internet connection. With WebReview's intuitive web-based interface, users can access any camera on the network to view live and recorded video, and control PTZ functionality.

Key Features:

- **Multi-camera View:** Simultaneously view up to 4 camera views from multiple recorders and sites; single or 2x2 mode.
- **Simultaneous Review:** Simultaneously review video recorded from up to 4 cameras.
- **Multi-field Query:** Query video by camera, date, time, and site.
- **Site Manager:** Administer and monitor large digital video networks operating in multiple locations. View live or recorded video from any IP-connected Loronix™ recorder, anywhere in the world.
- **Playback Controls:** Review video in single frame and multiple-frame increments, either in forward or reverse play back.
- **PTZ Camera Control:** Digitally control Pan, Tilt and Zoom functions at the click of a mouse; this works with a wide variety of analog video matrix switches, code generators and PTZ cameras.
- **Activity Scan:** Detects and displays activity in recorded video quickly and easily; examines the frames of a video segment to detect changes from image to image.
- **Bandwidth Throttling:** Automatically controls bandwidth utilization of live and recorded video.
- **Simple Export:** Export video in industry-standard Windows Media format to replay on any PC using Windows Media Player.
